Green School

Green School in Bali is an unusual school.

It was an experience in 2010 by John and Cynthia Hardy. Their idea was to make a school that was totally environmentally friendly. Everything in the school is « green » -that means it's good for the environment. The classrooms are made of bamboo wood and the light is from the sun. The school uses solar power and water power from their river.

Hardy's experiment was successful and there are now 160 students from more than twenty-five countries – and it goes from kindergarten up to age eighteen. The students at Green School don't only learn subjects such as English and Maths ; they also learn to grow organic vegetables and other foods such as rice in the huge school garden. They look after the plants and learn to cook them. The school also has a cow, some pigs and a buffalo. The students also study building, making furniture and traditional art and dance.

The Hardys want the local community to be a part of Green School. They have a rule that twenty percent of the students must be from Bali because they want local children to learn about protecting the environment. The children are often poor, so people from all over the world pay for them to go to school. The idea of green living is becoming more popular and now people are building green houses near the school so children can walk to school. The Hardys' dream is that one day all the schools in the world will be green.

I'm writing this blog to warn you against the dangers of smoking. First, smoking is a nasty habit because it harms every part of your body from your appearance to your organs. Second, smoking is a slow suicide. It shortens your life and makes you addicted to the poisonous substance which is called nicotine. Then, smoking is a waste of money. Every day cigarette prices are getting more and more expensive. Besides, by smoking you are not only damaging your own health but also the health of the people around you. They are actually passive smokers and they risk to suffer from breathing problems such as asthma. Finally, there is nothing good about smoking as it helps to make the problem of pollution worse and worse. So, Mind your health, the health of the people around you and the environment and quit/ give up smoking before it's too late!

While surfing the net you found a blog called **"Be Green. Let's take action"** in which the blogger Pauline warns us against the harmful effects of pollution on our planet as well as on our health. Join the blog to talk about actions you can take to save our planet and the future generations

The form is a simulated Facebook post creation interface. At the top, it features the Facebook logo and a search bar with the text "Search for people, places and things". Below this is a profile picture placeholder showing a person in a white shirt. To the right of the profile picture is a text box containing "From.....to Pauline". The main body of the form is a large area with horizontal dotted lines for writing the post content.
